# KESO KEK Genie Knob

Mechanically outstanding. Electronically now more than ever.

# Intelligent locking technology in next to no time.

## KESO KEK Genie Knob

The KESO KEK Genie Knob enables fully mechanical locking systems to be upgraded in next to no time to the level of modern mechatronic systems. With no wiring required, the knob's electronics provide additional convenient functions such as immediate blocking when keys are lost or a programming option for time-restricted accesses. The KESO KEK Genie Knob is unbeatable when structural or architectural conditions such as fire doors, metal frame doors or listed buildings need to be taken into consideration.

### Benefits

- Combination of mechanical security and electronic intelligence
- Time-limited access authorisation programming, key blocking, event logging and much more
- Standard long-life batteries easily replaced
- Modular cylinder design

### Management/Programming

- Home version with master key for decoding and programming
- PC version with KESO management software and KESO KEK Programmer PPG V2

1. Economical: Fitted without the expense of wiring; electronics and power supply integrated into knob.

2. Perfect: Absolute KESO precision with hardened HRC 60 bolts.

3. Optional: Explosion-proof version with ATEX certification.

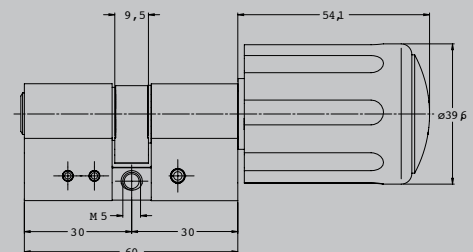

### Technische Daten

- Compatible with all KESO mechanical cylinder systems
- Euroswiss and Euro cylinder profiles
- Extensions: at 5 mm steps each side
- Surface: matt chrome plated (standard) or nickel-plated
- Power supply: 3 standard LR1 batteries in the knob
- Battery life span: about 80'000 lock procedures or 2 years
- Protection rating: IP 54
- ATEX Ex II 2G Ex ib IIC T4 optional
- Temperature range: -10° to +50° C
- Air humidity: 15 to 70 %
- VdS class A; with ABS VdS class B

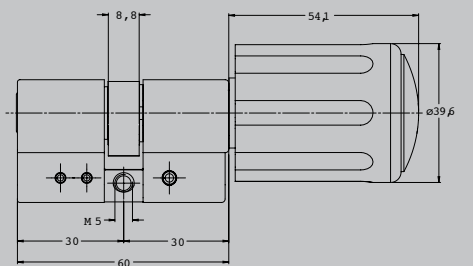

### Requirements

Range of use: backsets of 35 mm and above without cylinder projection

### Europrofil

### EuroSwiss
