

## Product discontinuation

Dear KESO-Partner

Since 2004 the KESO trapeze key with colour cap is available in 18 attractive colour variations. At the same time the KEK Combi key had been introduced into the market with identical colours. The ergonomic design of the KEK Combi led quickly to its use in pure mechanical master key systems, without being equipped with a transponder chip.

The increasing need of such "trimmed" KEK Combi keys and the outstanding acceptance of the colour caps resulted in the development of the long and extra-long key with colour cap, which was launched in 2008. The shape of the new colour cap matches the established KEK Combi and can perfectly be integrated into existing installations. Last but not least the considerably reduced costs are a great benefit for all market participants.

KEK Combi without Chip  
#0.272

Long key with colour cap  
#0.991

Please note that the KEK Combi key without RFID chip will be withdrawn from the market on the 1st of July 2009. All other models of the KEK Combi key are not affected.

We are convinced to match with your intensions with this contribution to reduce costs and would like to thank you for the excellent cooperation in the past.

Best regards,

KESO AG
