

Market launch

Dear KESO partner

The new locking system KESO 4000, launched in October 2008, obtains reinforcements. The announced cylinder types which are mentioned in the pricelist 2009 are now available. This range extension allows you to meet better the requirements of your customers and offering them a complete assortment for a wide range of applications.

The following cylinder types are available starting from 1st of July 2009:

41.465 / 41.765	Double cylinder asymmetric
41.473 / 41.773	Double cylinder asymmetric with Prio
41.21P / 41.41P	Half cylinder with 2 threads M4
41.464 / 41.764	Half cylinder asymmetric
41.234 / 41.434	Half cylinder with freewheeling cam 90°
41.20D	Thumbturn cylinder MOZYeco
41.466 / 41.766	Thumbturn cylinder asymmetric
43.145	Mounting cylinder
43.073	Rod lock surface mounted
43.030 / 43.084	Dead lock round / surface mounted
43.074 / 43.075	Dead lock with bolt / latch
44.009 / 44.119	Window levers

Reminder: Besides of the tried and trusted step-drilling technique the KESO 4000 carries not only the still patented Omega-function as a standard but also a patent protection until 2023 for the novel front profile in key and plug head. Cylinders with drilling protection are accredited in the VdS-class BZ+ which includes the pulling protection for the plug.

We are glad to make these new cylinder types available and to provide you with additional onvining arguments for the KESO 4000 system.

Best regards,

KESO AG
