# Short Cylinder

Half length, full performance.

# Big solutions from a mere 28 mm.

## KESO Short Cylinder

Based on the successful KESO 2000S reversible key technology, the KESO Short Cylinder excels due to its unrivalled compact design. This short device with its time-tested multi-sided contact and high-grade tumblers made of hardened steel (HRc 60) dovetails into a fitting depth of just 28 mm. Greater security is assured as the cylinder no longer protrudes from glass or rebated doors. It also underlines the sleek elegance emanating from glass elements without detracting from their homogenous structure. The KESO Short Cylinder is available keyed alike (KA) or keyed to differ (KD), incompatible to all existing system types.

### Benefits

- Unrivalled length of only 28 mm
- Can be extended separately on both sides
- With different surface finishes for greater aesthetic appeal
- Uses time-tested KESO reversible key technology
- Satisfies the most stringent of aesthetic requirements for use in:
  - . Glass doors, Folding doors
  - . Folding partition walls
  - . Sliding doors
  - . Steel frame profile doors
  - . and similar
- Standard range of KESO keys
- Drilling protection due to hardened pins HRc 60
- Higher security due to flush mount characteristics and one-piece plug (cylinder doesn't protrude, and cannot be broken off)
- Patented short cylinder technology
- Patented modular design
- Available as a finished product or as a kit, for individual extension or choice of colour.

### Instruction note

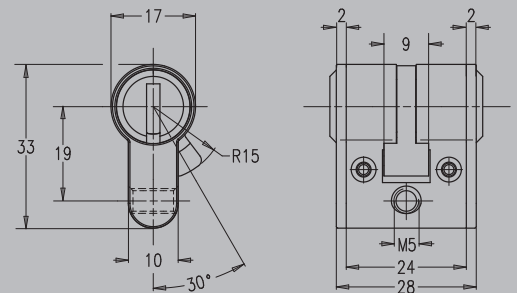

- Do not leave key inserted in the cylinder when doors are locked

The aesthetically appealing KESO Short Cylinder surprises due to its variable length and surfaces, which ensure greater versatility.

### Technical data

- KESO 2000SK system
- Article no.: 21.43C
